

OrthoDome® Faculty Instructions

What is OrthoDome® and how does it work?

OrthoDome sessions deliver **4K or HD surgical videos** on a huge screen with live narration from the experts. Each presentation block is 15 minutes, which includes the video as well as a Q&A session with the audience. Sessions are a mix of industry-sponsored and independent videos. Whether you are presenting a surgical technique, or on behalf of a company, your roles and responsibilities are the same:

Pre-meeting

- All OrthoDome videos must be submitted prior to the start of the meeting. **Videos will not be accepted onsite.** (If you are presenting on behalf of a company, please confirm with the company rep whether they will be uploading the video, or if you will be.)
- Videos must include **audio narration**. The video will be played muted at the meeting to allow for your live presentation. After the meeting, your video will be posted to OVT with the audio narration. Any videos without audio will not be posted to OVT.
- If you would like to begin your presentation with introductory slides, please upload a separate PPT file along with your video file. **Do not imbed your video into a PowerPoint file** – PPT does not support 4K video, and the quality of your video may be diminished.
- [Upload your video here](#) no later than **February 1, 2027**. Maximum file size is 32 GB. The file name should include the shortened title and presenter. For example: Sports Knee Injury_Bannon
- You will not be able to pause, forward, or rewind your video during the presentation. As such, we recommend **practicing your presentation with your muted video** so that you are comfortable with the timing.

Onsite

- If you wish to review your video prior to the session, you may visit the **OrthoDome Presenter Review Station**, located behind the OrthoDome structure. The station will be staffed at the following times:
 - Tuesday: 2pm-5pm
 - Wednesday: 1pm-5pm
 - Thursday: 1pm-5pm
 - Friday: 9am-12pm
- If you are presenting slides before your video, verbally acknowledge when it's time to switch over to the video, and the AV team will switch the feed. You can say something like, "We can go ahead and play the video now," or similar.
- After your presentation, open the room up for questions. The moderators have been asked to come prepared with questions in the event the audience is quiet.
