AAOS/ASES Anatomic and Reverse Total Shoulder Arthroplasty

Joseph A. Abboud, MD, FAAOS
Course Director

J. Michael Wiater, MD, FAAOS
Course Director

From evaluation and planning through surgical application and post-operative management, discover technical pearls to optimize success for TSA.

This content-packed, interactive online course engages you with surgical demonstrations, case debates, rapid-fire panel discussions, and Q&A with faculty.

Refresh your approaches, modernize your techniques, and return to practice refreshed with new insights and options.

**For full session details and to register,
visit aaos.org/TSA20 or call
AAOS Customer Service at 1-800-626-6726.**

AAOS designates this live activity for a maximum of **10.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credits commensurate with the extent of their participation in the activity.

Watch pre-recorded lectures in advance, then tune in on November 7 for live sessions.

PRE-RECORDED SESSIONS – Available October 30

Indications

10 Steps to Successful Arthroplasty Exposure

Subscapularis Sparing Approach

When to Use a Stemless

Reverse TSA Biomechanics

Technical Pearls for Reverse TSA

Reverse TSA for Failed Shoulder Arthroplasty

Postoperative Rehabilitation and Activity

Reverse TSA for Acute Fracture

LIVE-STREAMED SESSIONS – November 7

LECTURES

Managing the Subscapularis in Anatomic and Reverse TSA

Perioperative Management

Pre-Operative Planning

Management of the Infected Shoulder Arthroplasty

Management of Massive Glenoid Bone Loss in Primary and Revision Setting

SYMPOSIA

Irreparable Rotator Cuff

Complications of Reverse TSA

Outpatient Shoulder Arthroplasty

CASE DEBATES

Hemi vs. TSA

Anatomic TSA vs. Reverse TSA

Reverse Prosthesis Design

PANELS

Managing the Glenoid A-E

Bundled Payments, Episodes of Care, Billing and Coding

FACULTY SURGICAL DEMONSTRATIONS

Primary Anatomic TSA

- Deltopectoral Approach, Subscapularis Management, Glenoid Instrumentation
- Humeral Instrumentation
- Subscap Repair

Reverse TSA for Fracture

Tuberosity Reconstruction

All content will be recorded and available for 90 days following the event.
