PICO Questions and Inclusion Criteria

PICO Questions

1. In adult (>17) patients with symptomatic osteoarthritis of the knee, do assistive devices (canes, shoe inserts, etc.) improve patient outcomes?
2. In adult (>17) patients with symptomatic osteoarthritis of the knee, do braces improve patient outcomes?
3. In adult (>17) patients with symptomatic osteoarthritis of the knee, do oral/dietary supplements improve patient outcomes?
4. In adult (>17) patients with symptomatic osteoarthritis of the knee, do topical treatments improve patient outcomes?
5. In adult (>17) patients with symptomatic osteoarthritis of the knee, does exercise and activity improve patient outcomes?
6. In adult (>17) patients with symptomatic osteoarthritis of the knee, do weight loss interventions improve patient outcomes?
6b. In adult (>17) patients with symptomatic osteoarthritis of the knee, is the extent of weight lost associated with improved patient outcomes?
7. In adult (>17) patients with symptomatic osteoarthritis of the knee, do manual therapies (manipulation, mobilization, massage, etc.) improve patient outcomes?
8. In adult (>17) patients with symptomatic osteoarthritis of the knee, do physical/electrotherapeutic agents (acupuncture, heat, ice, TENS, etc.) improve patient outcomes?
9. In adult (>17) patients with symptomatic osteoarthritis of the knee, what systemic treatments are most effective for improving patient outcomes?
10. In adult (>17) patients with symptomatic osteoarthritis of the knee, what locally invasive treatments are most effective for improving patient outcomes?
11. In adult (>17) patients with symptomatic osteoarthritis of the knee, does arthroscopic debridement improve patient outcomes?
12. In adult (>17) patients with symptomatic osteoarthritis of the knee, does partial meniscectomy improve patient outcomes?
13. In adult (>17) patients with symptomatic osteoarthritis of the knee, does osteotomy improve patient outcomes?

Standard Inclusion Criteria

- Article must be a full article report of a clinical study (studies using registry data can be included in a guideline if it is published in a peer-reviewed journal and meets all other inclusion criteria/quality standards).
- Retrospective non-comparative case series, medical records review, meeting abstracts, historical articles, editorials, letters, and commentaries are **excluded**.
- Confounded studies (i.e. studies that give patients the treatment of interest AND another treatment without appropriate sub-analysis or statistical adjustment) are **excluded**.
- Case series studies that have non-consecutive enrollment of patients are **excluded**.
- Controlled trials in which patients were not stochastically assigned to groups AND in which there was either a difference in patient characteristics or outcomes at baseline AND where the authors did not statistically adjust for these differences when analyzing the results are **excluded**.
- All studies of “Very Low” quality of evidence (e.g. Level V) are **excluded**.
- Study must appear in a peer-reviewed publication
- For any included study that uses “paper-and-pencil” outcome measures (e.g. Composite measures, SF-36, etc.), only those outcome measures that have been validated will be included
- For any given follow-up time point in any included study, there must be $\geq 50\%$ patient follow-up (if the follow-up is $>50\%$ but $<80\%$, the study quality will be downgraded by one Level)
- Study must be of humans
- Study must be published in English
- Study results must be quantitatively presented
- Study must not be an in vitro study
- Study must not be a biomechanical study
- Study must not have been performed on cadavers

Customized Inclusion Criteria

- Study must be regarding osteoarthritis with a population of at least **80% OA adult (>17) knee patients**
- Study must be published in or after **[no date limit]**
- Study should have **30 or more patients per group**
- Consider follow-up times at a minimum of **4 weeks**

Literature Search Strategy

Literature Search Methods

The medical librarian conducted a comprehensive search of MEDLINE, Embase, and the Cochrane Central Register of Controlled Trials based on key terms and concepts from the workgroup-defined PICO questions. Bibliographies of relevant systematic reviews were hand searched for additional references. All databases were last searched on **April 28, 2020** with limits for publication dates from 2012-present and English language.

For PRISMA diagram

Records identified through database searching: **25,773**

Records after duplicates removed: **16,635**

Additional records identified through other sources: **236**

Records screened: **16,871**

AAOS Approval Bodies

Committee on Evidence Based Quality and Value

The committee on Evidence Based Quality and Value (EBQV) consists of twenty-three AAOS members who implement evidence-based quality initiatives such as clinical practice guidelines (CPGs), systematic literature reviews (SRs) and appropriate use criteria (AUCs). They also oversee the dissemination of related educational materials and promote the utilization of orthopaedic value products by the Academy's leadership and its members.

Council on Research and Quality

The Council on Research and Quality promotes ethically and scientifically sound clinical and translational research to sustain patient care in musculoskeletal disorders. The Council also serves as the primary resource for educating its members, the public, and public policy makers regarding evidenced-based medical practice, orthopaedic devices and biologics, regulatory pathways and standards development, patient safety, and other related important research and quality areas. The Council is comprised of the chairs of the committees on Devices, Biologics, and Technology, Patient Safety, Research Development, U.S. and chair and section leaders of the Evidence Based Quality and Value committee. Also, on the Council are the second vice-president, three members at large, and representatives of the Diversity Advisory Board, Women's Health Issues Advisory Board, Board of Specialty Societies (BOS), Board of Councilors (BOC), Communications Cabinet, Orthopaedic Research Society (ORS), Orthopedic Research and Education Foundation (OREF).

Board of Directors

The 17-member Board of Directors manage the affairs of the AAOS, set policy, and oversee the Strategic Plan

Review Organizations

Review of the clinical practice guideline is completed by interested external organizations. The AAOS solicits reviewers for each clinical practice guideline. They consist of experts in the topic area and represent professional societies other than AAOS. Review organizations are nominated by the clinical practice guideline development group at the introductory meeting. Review responses are available on www.aaos.org/quality.

Participation in the AAOS systematic literature review peer review process does not constitute an endorsement, nor does it imply that the reviewer supports this document.

Kaitlyn S. Sevarino, MBA, CAE
Director
Department of Clinical Quality and Value, AAOS

Dear Ms. Sevarino:

The American Association of Hip and Knee Surgeons (AAHKS) has voted to endorse the AAOS Clinical Practice Guideline for the Management of Osteoarthritis of the Knee (Non-Arthroplasty) 3rd Edition. This endorsement implies permission for the AAOS to officially list our organization as an endorser of this clinical practice guideline and reprint our logo in the introductory section of the clinical practice guideline review document.

Sincerely,

A handwritten signature in black ink that reads "Richard Iorio". The signature is fluid and cursive, with "Richard" on top and "Iorio" below it, though they appear connected.

Richard Iorio, MD
President, AAHKS

March 17, 2022

Dear Ms. Sevarino,

The APTA Executive Committee of the Board of Directors has voted to endorse the AAOS Clinical Practice Guideline for the Management of Osteoarthritis of the Knee (Non-Arthroplasty) 3rd Edition and the AAOS Clinical Practice Guideline for the Management of Hip Fractures in Older Adults. This endorsement implies permission for the AAOS to officially list our organization as an endorser of this clinical practice guideline and reprint our logo in the introductory section of the clinical practice guideline review document.

Sincerely,

A handwritten signature in black ink that reads "Roger Herr". The signature is fluid and cursive, with "Roger" on top and "Herr" below it, separated by a short horizontal line.

Roger Herr, PT
President, APTA
