

## Cohere Pilot Measures

### 90-Day Readmission

### Payer Measure (PM-3)

Percentage of cases where patients were readmitted to the hospital within 90 days of a primary procedure.

**Numerator** Number of cases where patients were readmitted to the hospital within 90 days of receiving a primary total hip or total knee replacement.

---

**Denominator** Out of all total hip or total knee replacements from all sites submitting postoperative data, for the performance period.

**Exclusions:** Cases of femoral neck fracture and sites without post-op data

### Discharged to Home

### TJC Measure (THKR-3)

Patients discharged to home following total hip or total knee replacement.

**Numerator** Patients discharged to home following total hip or total knee replacement.

---

**Denominator** Patients undergoing a total hip or total knee replacement.

**Exclusions:** Patients less than 18 years of age, patients who have a length of stay greater than 120 days, Residents of other health care facility, patient expired, patient left AMA, documented medical/social reason why patient cannot be discharged to home, and further coding exclusions listed [here](#) for the TJC THKR-3. Our dashboards take these into account when calculating the measure.

## Preoperative Functional/Health Status Assessment

## TJC Measure (THKR-4)

Percentage of patients who completed the general health and joint specific functional status assessments within 90 days prior to surgery as specified below:

- Hips: [VR-12 or PROMIS-Global] AND [HOOS Jr. (6 questions) or HOOS Pain, Function Daily Living Subscales (27 questions)]
- Knees: [VR-12 or PROMIS-Global] AND [KOOS Jr. (7 questions) or KOOS Stiffness, Pain, Function Daily Living Subscales (28 questions)]

**Numerator** Patients who completed the general health (VR-12 or PROMIS-Global) AND joint specific functional status assessments (HOOS Jr./subscales or KOOS Jr./subscales) within 90 days prior to surgery.

---

**Denominator** Patients undergoing a total hip or total knee replacement.

**Exclusions:** Patients less than 18 years of age, patients who have a length of stay greater than 120 days, and further coding exclusions listed [here](#) for the TJC THKR-4 exclusions. Our dashboards take these into account when calculating the measure.

## Postoperative Functional/Health Status Assessment

## TJC Measure (THKR-5)

Percentage of patients who completed the general health and joint specific functional status assessments within 90 days after surgery as specified below:

- Hips: [VR-12 or PROMIS-Global] AND [HOOS Jr. (6 questions) or HOOS Pain, Function Daily Living Subscales (27 questions)]
- Knees: [VR-12 or PROMIS-Global] AND [KOOS Jr. (7 questions) or KOOS Stiffness, Pain, Function Daily Living Subscales (28 questions)]

**Numerator** Patients who completed the general health (VR-12 or PROMIS-Global) AND joint specific functional status assessments (HOOS Jr./subscales or KOOS Jr./subscales) within 90 days after surgery.

---

**Denominator** Patients undergoing a total hip or total knee replacement.

**Exclusions:** Patients less than 18 years of age, patients who have a length of stay greater than 120 days, and further coding exclusions listed [here](#) for the TJC THKR-4 exclusions. Our dashboards take these into account when calculating the measure.
