In March 2022, the American Academy of Orthopaedic Surgeons (AAOS), with support from the Orthopaedic Trauma Association (OTA), launched the Fracture & Trauma Registry (FTR). FTR is the fifth and newest addition to a series of anatomical, quality improvement registries, capturing national data on five of the more common fractures: Ankle, Hip, Distal Femur, Distal Radius, and Proximal Humerus.

**Key Contributors:**

**The FTR Steering Committee**
- Michael J. Gardner, MD, FAAOS, Chair  
  Stanford University
- Jaimo Ahn, MD, PhD, FAAOS  
  University of Michigan
- Kyle J. Jeray, MD, FAAOS  
  Prisma Health
- Douglas W. Lundy, MD, MBA, FAAOS  
  St. Luke’s University Health Network
- Saam Morshed, MD, PhD, MPH, FAAOS  
  University of California, San Francisco
- William T. Obremskey, MD, MPH, FAAOS  
  Vanderbilt Ortho Institute
- Steven A. Olson, MD, FAAOS  
  Duke Hospital
- Heather A. Vallier, MD, FAAOS  
  Case Western Reserve University
- Philip R. Wolinsky, MD, FAAOS  
  Dartmouth Medical Center

**On the Horizon**

As FTR grows, there will be benchmarking capabilities available for surgeons to compare their data against national aggregate data on procedural trends and outcomes. The AAOS is consulting with our participants to optimize the collection of clinical and operative data through tools and resources that will be made available at the point of care.

“By aggregating data from sites across the country, we can really start to distinguish patterns in the data that otherwise would have gone unnoticed. We also can provide surgeons with internal and external benchmarks for continuous quality improvement. We believe this is a unique opportunity to drive meaningful performance improvement.”

- Michael J. Gardner, MD, FAAOS, FTR Steering Committee Chair
FTR Common Data Elements

**PROCEDURAL**

**Patient**
- Name (Last, First)
- Date of Birth
- Social Security Number
- Diagnosis (ICD-10)
- Gender
- Race/Ethnicity
- Residential Setting
- Ambulatory Status
- Pre-operative Modified Fraility Index (MFI-5)
- Delirium Score

**Site of Service**
- Name and Address (TIN/NPI)

**Surgeon**
- Name (NPI)

**Fracture**
- Fracture Type
- Fracture Classification

**Procedure**
- Type (ICD-10, CPT)
- Date of Surgery
- Injury Date
- Regional Block
- Osteoporosis Screening
- Calcium/Vitamin D Supplementation
- Implants and Grafts

**Comorbidities and Complications**
- Comorbidities (ICD-10)
- Height + Weight/Body Mass Index
- Length of Stay
- American Society of Anesthesiologists Score
- Charlson Comorbidity Index (CCI)
- Operative and Post-operative Complications
- COVID-19 as a prior diagnosis

**Patient-Reported Outcomes**
- PROMIS-10 Global or VR-12
- PROMIS Physical Function
- Anatomic-specific PROMs for each module

Also Accepted:
- PROMIS-29
- PROMIS Anxiety
- PROMIS Depression
- PROMIS Pain Interference
- PROMIS-CAT (only accepting summary scores)

**Modules Available**
- Ankle fracture
- Distal femur fracture
- Distal radius fracture
- Hip fracture
- Proximal humerus fracture
Procedure-Specific Data Elements

ANKLE FRACTURE
Fracture
- Dislocation Type
- Open/Closed
- Injury Mechanism
- Pre-operative Closed Reduction

Procedure
- External Fixation
- Syndesmotic Fixation
- Lateral, Posterior Malleolus, Medial Treatment
- Adjunct Treatments
- Associate Articular Impaction Details
- Stress Evaluation Method and Findings

Anatomic-Specific PROMs
- PROMIS Pain Interference

Additionally Accepted:
- FAAM
- FAOS

HIP FRACTURE
Fracture
- Fracture Stability

Procedure
- Surgical Approach *arthroplasty only
- Surgical Technique
- Fixation Type

Anatomic-Specific PROMs
- HOOS, Jr.

Additionally Accepted:
- HOOS

DISTAL RADIUS FRACTURE
Fracture
- Fracture Status
- Pre-operative Closed Reduction
- Angulation Type
- Shear Type
- Presence of Scaphoid Fracture
- Presence of Ipsilateral Ulnar Fracture

Procedure
- Fixation Type
- ORIF Fixation
- Pre-ORIF with Staged External Fixation
- TFCC Repair
- Distal Radioulnar Joint Stabilization

Post-Operative
- Range of Motion
- Grip Strength

Anatomic-Specific PROMs
- DASH or QuickDash

PROXIMAL HUMERUS FRACTURE
Patient
- Pre-operative Advanced Imaging

Fracture
- Presence of Full-Thickness Rotator Cuff Tear
- Presence of Glenohumeral Dislocation
- Presence of Osteoarthritis or Inflammatory Arthritis

Procedure
- Surgical Approach
- Surgical Technique

Anatomic-Specific PROMs
- ASES
- SANE

Additionally Accepted:
- PROMIS Upper Extremity

DISTAL FEMUR FRACTURE
Fracture
- Presence of Bone Defect

Procedure
- Use of Bone Cement
- Planned Return to OR

Anatomic-Specific PROMs
- KOOS, Jr.

Additionally Accepted:
- KOOS
