AAOS Outpatient and Rapid Recovery in Total Joint Replacement

One-Day
Course!

Friday, October 18, 2019 • Rosemont, IL

Successfully implement a rapid recovery program, improve efficiency and optimize patient satisfaction

The only course of its kind for orthopaedic surgeons, this single-day program addresses the increasing demand for same-day discharge after total joint replacement. Expert faculty offer their “playbook” for physicians to safely implement and build an outpatient program in their institution or practice, with crucial considerations, pathway options, and protocols.

Through focused lectures and interactive panel discussions, faculty will share how they successfully transitioned their procedures to the outpatient setting, while keeping patient safety and satisfaction at the forefront.

Participate with your care team! Bring your PAs, nurses, anesthesiologists and hospital administrators to build synergy across all touchpoints of your program.

At the conclusion of this course, learners should be able to:

- Implement a Rapid Recovery Program at their clinic or hospital
- Identify the benefits of a rapid recovery program for their patients
- Recognize the importance of accelerated recovery for their patients
- Compose implementation plans formulated for their institution
