Management of 4-part Humeral Fractures
- Anthony A. Barnes, MD
- Revesa TSA

Friday, March 4, 8:00 – 9:00 AM
Master of Ceremonies: William N. Levine, MD

Specialty Day: Saturday, March 5

Specialty Day is dedicated to educational programming created by many of the orthopaedic specialty societies represented in the Board of Specialty Societies (BOS). Those organizations include:

- American Orthopaedic Foot & Ankle Society
- American Orthopaedic Society for Sports Medicine
- American Shoulder and Elbow Surgeons
- American Society for Surgery of the Hand and American Association for Hand Surgery
- Arthroscopy Association of North America
- Federation of Spine Associations
- American Spinal Injury Association
- North American Spine Society
- Spinal Stenosis (Operative and Nonoperative) (348)

With the orthopaedic community continuing to grow with cutting-edge technology and medical advancements, we need to ensure that we have a forum to share ideas, knowledge, and experiences. Specialty Day provides the opportunity to showcase new developments, exchange information, and interact with one another.

To review the preliminary program of www.aaos.org/impprogram to identify the programs you wish to attend. All programs offer CME.

Register for Specialty Day:
Simply add Specialty Day when you register for the AAOS Annual Meeting.
