General Information

Target Audience
This meeting is designed for orthopaedic surgeons and is beneficial to related allied health care professionals. OTA has created the program based on stated needs and interests expressed from previous Specialty Day attendee evaluations.

Educational Objectives
- To apply prominent recent studies in the orthopaedic literature to enhance decision-making and maximize outcomes in fracture management.
- To analyze and incorporate into practice modern fixation techniques.
- To define the complexities of providing geriatric fracture care and identify optimal treatment strategies.
- To apply evidence-based medicine and expert experience in the decision-making process for difficult injuries.
- To summarize weight bearing recommendations after fracture management.
